Pioneer Variable Contracts Trust files a complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. Shareholders may view the filed Form N-PORT by visiting the Commission's web site at <https://www.sec.gov>.

## Portfolio Update 12/31/22

### Sector Distribution

(As a percentage of total investments)\*

### 5 Largest Holdings

(As a percentage of total investments)\*

1. Alphabet, Inc.	6.98%
2. Apple, Inc.	5.05
3. Microsoft Corp.	4.72
4. Analog Devices, Inc.	4.67
5. Truist Financial Corp.	4.38

\* Excludes short-term investments and all derivative contracts except for options purchased. The Portfolio is actively managed, and current holdings may be different. The holdings listed should not be considered recommendations to buy or sell any securities.

## Performance Update 12/31/22

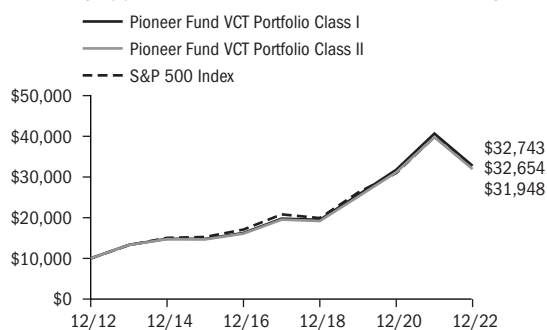

### Prices and Distributions

Net Asset Value per Share	12/31/22	12/31/21
Class I	\$13.05	\$19.80
Class II	\$13.19	\$19.97

Distributions per Share (1/1/22 - 12/31/22)	Net Investment Income	Short-Term Capital Gains	Long-Term Capital Gains
Class I	\$0.0985	\$1.0505	\$1.6765
Class II	\$0.0600	\$1.0505	\$1.6765

### Performance of a \$10,000 Investment

The following chart shows the change in value of an investment made in Class I and Class II shares of Pioneer Fund VCT Portfolio at net asset value during the periods shown, compared to that of the Standard & Poor's 500 Index (the S&P 500). Portfolio returns are based on net asset value and do not reflect any applicable insurance fees or surrender charges.

The Standard & Poor's 500 Index (the S&P 500) is an unmanaged, commonly used measure of the broad U.S. stock market. Index returns are calculated monthly, assume reinvestment of dividends and do not reflect any fees, expenses or sales charges. It is not possible to invest directly in an index.

Call 1-800-688-9915 or visit [www.amundi.com/us](http://www.amundi.com/us) for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted.

The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost.

The returns for the Portfolio do not reflect the deduction of expenses associated with variable products, such as mortality and expense risk charges, separate account charges, and sales charges. These expenses would reduce the overall returns shown.

Performance results reflect any applicable expense waivers in effect during the periods shown. Without such waivers, performance would be lower. Waivers may not be in effect for all portfolios. Certain fee waivers are contractual through a specified period. Otherwise, fee waivers can be rescinded at any time. See the prospectus and financial statements for more information.

### Average Annual Total Returns

(As of December 31, 2022)

	Class I	Class II	S&P 500 Index
10 Years	12.59%	12.32%	12.56%
5 Years	10.62%	10.35%	9.42%
1 Year	-19.50%	-19.68%	-18.11%

All total returns shown assume reinvestment of distributions at net asset value.

The performance table does not reflect the deduction of taxes that a shareowner would pay on distributions or the redemption of shares.

## Comparing Ongoing Portfolio Expenses

As a shareowner in the Portfolio, you incur two types of costs:

- (1) ongoing costs, including management fees, distribution and/or service (12b-1) fees, and other Portfolio expenses; and
- (2) transaction costs, including sales charges (loads) on purchase payments.

This example is intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds offered through your variable annuity contract. The example is based on an investment of \$1,000 at the beginning of the Portfolio's latest six-month period and held throughout the six months.

### Using the Tables

#### Actual Expenses

The first table below provides information about actual account values and actual expenses. You may use the information in this table, together with the amount you invested, to estimate the expenses that you paid over the period as follows:

- (1) Divide your account value by \$1,000  
Example: an \$8,600 account value ÷ \$1,000 = 8.6
- (2) Multiply the result in (1) above by the corresponding share class's number in the third row under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Expenses Paid on a \$1,000 Investment in Pioneer Fund VCT Portfolio

Based on actual returns from July 1, 2022 through December 31, 2022.

Share Class	I	II
Beginning Account Value on 7/1/22	\$1,000.00	\$1,000.00
Ending Account Value (after expenses) on 12/31/22	\$1,006.00	\$1,005.30
Expenses Paid During Period*	\$ 3.84	\$ 5.10

\* Expenses are equal to the Portfolio's annualized net expense ratio of 0.76% and 1.01% for Class I and Class II shares, respectively, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

#### Hypothetical Example for Comparison Purposes

The table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

You may use this information to compare the ongoing costs of investing in the Portfolio and other variable annuities. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other variable annuities.

Please note that the expenses shown in the tables are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as sales charges (loads) that are charged at the time of the transaction. Therefore, the table below is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different variable annuities. In addition, if these transaction costs were included, your costs would have been higher.

#### Expenses Paid on a \$1,000 Investment in Pioneer Fund VCT Portfolio

Based on a hypothetical 5% return per year before expenses, reflecting the period from July 1, 2022 through December 31, 2022.

Share Class	I	II
Beginning Account Value on 7/1/22	\$1,000.00	\$1,000.00
Ending Account Value (after expenses) on 12/31/22	\$1,021.37	\$1,020.11
Expenses Paid During Period*	\$ 3.87	\$ 5.14

\* Expenses are equal to the Portfolio's annualized net expense ratio of 0.76% and 1.01% for Class I and Class II shares, respectively, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

## Portfolio Management Discussion 12/31/22

Call 1-800-688-9915 or visit [www.amundi.com/us](http://www.amundi.com/us) for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted.

The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost.

The returns for the Portfolio do not reflect the deduction of expenses associated with variable products, such as mortality and expense risk charges, separate account charges, and sales charges. These expenses would reduce the overall returns shown.

Performance results reflect any applicable expense waivers in effect during the periods shown. Without such waivers, performance would be lower. Waivers may not be in effect for all portfolios. Certain fee waivers are contractual through a specified period. Otherwise, fee waivers can be rescinded at any time. See the prospectus and financial statements for more information.

*In the following discussion, Jeff Kripke discusses the market environment during the 12-month period ended December 31, 2022, and Pioneer Fund VCT Portfolio's performance during the period. Mr. Kripke, a senior vice president and a portfolio manager at Amundi Asset Management US, Inc. (Amundi US), is responsible for the day-to-day management of the Portfolio, along with James Yu, a vice president and a portfolio manager at Amundi US, Craig Sterling, Managing Director, Director of Core Equity and Head of Equity Research, US, and a portfolio manager at Amundi US, and John Carey, Managing Director, Director of Equity Income, US, and a portfolio manager at Amundi US.*

**Q: How did the Portfolio perform over the 12-month period ended December 31, 2022?**

**A:** Pioneer Fund VCT Portfolio's Class I shares returned -19.50% at net asset value during the 12-month period ended December 31, 2022, and Class II shares returned -19.68%, while the Portfolio's benchmark, the Standard & Poor's 500 Index (the S&P 500), returned -18.11%.

**Q: How would you describe the market for equities during the 12-month period ended December 31, 2022?**

**A:** The 12-month period ended December 31, 2022 featured heavy equity-market volatility, persistently high inflation readouts, and rising interest rates, all of which combined to lead to a broad retreat in the performance of domestic equities.

In response to high levels of inflation not seen in roughly 40 years, the US Federal Reserve (Fed) began raising the target range for the federal funds rate in March 2022, and also ended its pandemic-era quantitative easing (bond purchase) program. The Fed increased the federal funds rate's target range seven times between March and December 2022, including four consecutive increases of 75 basis points (bps) each from June to November 2022, an unprecedented occurrence (a basis point is equal to 1/100<sup>th</sup> of a percentage point). The Fed also enacted another 50-bps increase in interest rates in December, just before the end of the period.

The decline in the domestic equity market was particularly concentrated within growth stocks, which dramatically underperformed value stocks for the 12-month period. The broad US equity market, as measured by the S&P 500, registered a total return of -18.11% over the 12-month period, a significant drop-off from the 28.71% return the S&P 500 generated over the previous 12-month period ended December 31, 2021.

Market participants preferred value stocks over growth stocks during the past year, as shares of growth-oriented companies – which can be susceptible to rising interest rates, given that higher rates have tended to erode the value of those companies' earnings over the longer term – were shunned by investors in response to the Fed's attempts to combat inflation by increasing the federal funds target range.

During the 12-month period, the yield on the 10-year US Treasury bond rose from 1.51% (as of December 31, 2021) to 3.88% (as of December 31, 2022). That development presented a significant headwind to the performance of growth stocks, and particularly shares of those growth-oriented companies with high valuations based largely on future earnings.

Among the worst performers over the past year were the mega-cap technology stocks that had fared well during the COVID-19 pandemic in a

stay-at-home environment. The four largest stocks in the S&P 500 – Apple, Microsoft, Alphabet, and Amazon.com – all fell by well over 20%.

Only two sectors in the S&P 500 managed to eke out positive returns for the year: energy and utilities. Meanwhile, consumer discretionary, communication services, and information technology were the worst performers in the S&P 500, each declining by between 28% and 39% for the 12-month period ended December 31, 2022.

**Q: Which of your investment decisions either contributed positively to, or detracted from, the Portfolio's benchmark-relative performance during the 12-month period ended December 31, 2022?**

**A:** The Portfolio underperformed the S&P 500 for the 12 months ended December 31, 2022. Style preference was the primary driver of the Portfolio's benchmark-relative underperformance for the full calendar year as – consistent with our investment philosophy – the Portfolio was underweight versus the benchmark to low-price-to-earnings (P/E) stocks in favor of what we saw as higher-quality companies that we believe can sustain profits through a period of high inflation and declining economic growth. For the 12-month period ended December 31, 2022, low-P/E stocks outperformed as interest rates as well as the cost of capital have risen. On the other hand, the Portfolio's relative performance for the calendar year benefited from an underweight to stocks in the highest-P/E quintile within the S&P 500, due to our valuation discipline, which became an even bigger factor in the fourth quarter. However, the underweight to low-P/E stocks still offset that positive contribution and accounted for all of the Portfolio's relative underperformance for the full 2022 calendar year. (P/E Ratio reflects the price of a stock divided by its earnings per share. Cost of capital represents a calculation of the minimum return a company would need to justify a capital-budgeting project, such as building a new factory.)

At the sector level, stock selection results in the health care and financials sectors were the biggest drags on the Portfolio's relative returns. Meanwhile, stock selections in the communication services and information technology sectors benefited the Portfolio's relative performance. With regard to sector allocation, the Portfolio's overweight to the underperforming communication services sector detracted from relative returns, while an overweight to the strong-performing energy sector contributed positively to relative performance. Given its environmental, social, and governance (ESG) orientation, we have been selective with regard to the Portfolio's energy exposure, favoring companies that have been responsibly helping to meet short-term and longer-term energy demand. We favored the sector this past year, due to what we believe are attractive valuations amidst rising energy prices, though we have reduced the Portfolio's energy positions more recently. With regard to individual positions, Portfolio holdings that were key detractors from benchmark-relative returns for the 12-month period included Alphabet, Elanco Animal Health, and Live Nation Entertainment. Alphabet's share price was caught in the downdraft that affected the four largest mega-cap stocks in the S&P 500 during the period (discussed earlier), as investors sought out value over growth in an environment featuring rising interest rates. Elanco Animal Health was another detractor from the Portfolio's relative results for the period. While we have avoided investing the Portfolio in what we regard as distressed-value companies, as they do not meet our

## Portfolio Management Discussion 12/31/22 (continued)

investment criteria, we will at times hold value stocks in the Portfolio that can require more patience for the investment thesis to play out. Elanco, an animal health provider, is an example. Our investment thesis for Elanco is that new products could lead to higher revenue growth and improved profitability. So far, the company has not delivered, which has caused the stock to underperform the broader market. However, we continue to believe that if Elanco is successful with both its new product-launch cycle and cost-cutting measures, investors' concerns could abate. In communication services, the Portfolio's position in Live Nation Entertainment hindered relative performance over the 12-month period. Despite producing good results in its most recent quarter, driven by a strong summer season, Live Nation's shares underperformed in the wake of scrutiny over the handling of ticket presales for an upcoming Taylor Swift tour. We continue to hold the shares in the Portfolio, and believe the recent issues do not present a long-term challenge to the sustainability of Live Nation's business.

Holdings of energy stocks contributed positively to the Portfolio's relative results for the 12-month period – including positions in Schlumberger and EOG Resources – as did lack of exposure to Tesla. Schlumberger is a leading oilfield services company. The shares made a significant, positive contribution to the Portfolio's relative performance during the 12-month period, as oil prices remained high due to tight supply and geopolitical tensions. Schlumberger is a dominant firm in the oilfield services space and is widely regarded as the technology leader, allowing the company to attain premium pricing and maintain a competitive edge. We believe Schlumberger emerged from the recent down cycle for energy firms as a leaner, less capital-intensive company, which could lead to a more sustainable business over the long-term. The company also plays a critical role in addressing climate change by helping oil and gas companies improve operational efficiency while reducing or avoiding emissions and lowering water usage. Schlumberger has been making investments in businesses that support clean energy, carbon capture services, and geothermal energy. EOG Resources is a low-cost oil and gas producer, which outperformed for the full 12-month period, mainly due to the sharp increase in energy prices seen earlier in the year. While the elevated prices have subsided, they have remained relatively high. Finally, lack of exposure to S&P 500 component Tesla benefited the Portfolio's relative performance for the period. Even despite its recent underperformance, Tesla has remained one of the highest-valuation stocks in the industry, and remains squarely within the top quintile of the S&P 500. Tesla faced a slew of difficulties in 2022, including missed sales estimates, falling demand amid recession fears and interest-rate hikes, heightened competition, and continued pandemic-induced production challenges. Investors have also grown concerned over CEO Elon Musk's purchase of Twitter, and whether he is dedicating too much of his time to that endeavor. We continue to believe that Tesla remains overvalued.

**Did the Portfolio have any exposure to derivative securities during the 12-month period ended December 31, 2022?**

**A:** No, the Portfolio had no exposure to derivatives during the period.

**Q: Could you discuss the Portfolio's commitment to ESG investing?**

**A:** We consider environmental, social, and corporate governance (ESG) factors in our fundamental research and investment selection processes. We believe

**A Word About Risk:**

**All investments are subject to risk, including the possible loss of principal. In the past several years, financial markets have experienced increased volatility and heightened uncertainty. The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, changes in interest or currency rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues, armed conflict including Russia's military invasion of Ukraine, sanctions against Russia, other nations or individuals or companies and possible countermeasures, market disruptions caused by tariffs, trade disputes or other government actions, or adverse investor sentiment. These conditions may continue, recur, worsen or spread.**

*The Portfolio generally excludes corporate issuers that do not meet or exceed minimum ESG standards. Excluding specific issuers limits the universe of investments available to the Portfolio, which may mean forgoing some investment opportunities available to portfolios without similar ESG standards.*

this information helps us gain a more complete understanding of a company and its business. We have historically followed ESG criteria in managing the Portfolio. However, ESG investment criteria were formally incorporated into the Portfolio's prospectus on July 1, 2018. The Portfolio generally will not invest in companies significantly involved in certain business activities, including but not limited to, the production of alcohol, tobacco products, and certain controversial military weapons, and the operation of thermal coal mines and gambling casinos and other gaming businesses. We also consider pertinent ESG information, including ESG ratings, in seeking to avoid investing in companies perceived to have the most ESG-related risk.

**Q: What is your outlook as the Portfolio enters a new fiscal year?**

**A:** We anticipate continued market volatility as the Fed raises interest rates, inflation concerns persist, and the Russia-Ukraine conflict continues. However, we have grown more optimistic as equity valuations have become much more attractive, and we think a recession, if it occurs, is likely to be a shallow one, given the financial health of consumers. We believe US equities remain the best risk-reward opportunity globally.

We believe maintaining balanced exposures to stocks that we think may benefit from higher prices and interest rates, such as shares of banks and energy firms; to reasonably priced growth stocks, such as shares of semiconductor companies; and to more defensively oriented stocks, is the ideal approach in the current investment environment. By comparison, we believe equities of hyper-growth, unprofitable companies could be vulnerable to valuation compression if interest rates continue to rise. We also think low-quality, distressed-value stocks may underperform, especially shares of companies with excessive debt loads.

As of the end of December, the Portfolio's largest overweights relative to the S&P 500 were to the materials, communication services, and information technology sectors, though we have decreased the size of the overweight to information technology, somewhat. Despite its weak performance in 2022, we continue to believe the communication services sector has a favorable risk-reward profile, given potential long-term secular drivers for companies in the sector, such as artificial intelligence. The Portfolio's biggest underweight positions versus the benchmark are in the consumer-related sectors, due to concerns about sluggish unit-volume growth, and valuations. The Portfolio is also slightly underweight to financials, though it is overweight to banks, with a preference for regional banks. The Portfolio also continues to have no exposure to the real estate and utilities sectors, which have tended to be interest-rate sensitive.

*Please refer to the Schedule of Investments on pages 8 to 10 for a full listing of Portfolio securities.*

70,611(b)	<b>Open-End Fund — 0.0%†</b> Dreyfus Government Cash Management, Institutional Shares, 4.19%	\$ 70,611
		<u>\$ 70,611</u>
	<b>TOTAL SHORT TERM INVESTMENTS</b> (Cost \$70,611)	<u>\$ 70,611</u>
	<b>TOTAL INVESTMENTS IN UNAFFILIATED ISSUERS — 100.1%</b> (Cost \$92,600,509)	<u>\$115,396,945</u>
	<b>OTHER ASSETS AND LIABILITIES — (0.1)%</b>	<u>\$ (158,343)</u>
	<b>NET ASSETS — 100.0%</b>	<u><b>\$115,238,602</b></u>

(a) Non-income producing security.

(b) Rate periodically changes. Rate disclosed is the 7-day yield at December 31, 2022.

† Amount rounds to less than 0.1%.

Purchases and sales of securities (excluding short-term investments) for the year ended December 31, 2022, aggregated \$69,535,381 and \$80,662,016, respectively.

At December 31, 2022, the net unrealized appreciation on investments based on cost for federal tax purposes of \$93,856,609 was as follows:

Aggregate gross unrealized appreciation for all investments in which there is an excess of value over tax cost	\$28,843,525
Aggregate gross unrealized depreciation for all investments in which there is an excess of tax cost over value	<u>(7,303,189)</u>
Net unrealized appreciation	<u>\$21,540,336</u>

Various inputs are used in determining the value of the Portfolio's investments. These inputs are summarized in the three broad levels below.

Level 1 – unadjusted quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risks, etc.). See Notes to Financial Statements — Note 1A.

Level 3 – significant unobservable inputs (including the Adviser's own assumptions in determining fair value of investments). See Notes to Financial Statements — Note 1A.

The following is a summary of the inputs used as of December 31, 2022, in valuing the Portfolio's investments:

	Level 1	Level 2	Level 3	Total
Common Stocks	\$115,326,334	\$—	\$—	\$115,326,334
Open-End Fund	70,611	—	—	70,611
<b>Total Investments in Securities</b>	<u><b>\$115,396,945</b></u>	<u><b>\$—</b></u>	<u><b>\$—</b></u>	<u><b>\$115,396,945</b></u>

During the year ended December 31, 2022, there were no transfers in or out of Level 3.

## Statement of Assets and Liabilities 12/31/22

### ASSETS:

Investments in unaffiliated issuers, at value (cost \$92,600,509)	\$115,396,945
Receivables —	
Portfolio shares sold	2,907
Dividends	118,992
Interest	763
<b>Total assets</b>	<b><u>\$115,519,607</u></b>

### LIABILITIES:

Payables —	
Investment securities purchased	\$ 12,207
Portfolio shares repurchased	201,462
Trustees' fees	289
Professional fees	44,265
Management fees	8,192
Administrative expenses	3,584
Distribution fees	565
Accrued expenses	10,441
<b>Total liabilities</b>	<b><u>\$ 281,005</u></b>

### NET ASSETS:

Paid-in capital	\$ 88,645,383
Distributable earnings	26,593,219
<b>Net assets</b>	<b><u>\$115,238,602</u></b>

### NET ASSET VALUE PER SHARE:

No par value (unlimited number of shares authorized)	
Class I (based on \$94,581,206/7,245,574 shares)	\$ 13.05
Class II (based on \$20,657,396/1,566,104 shares)	<u>\$ 13.19</u>

## Statement of Operations

### FOR THE YEAR ENDED 12/31/22

#### INVESTMENT INCOME:

Dividends from unaffiliated issuers	\$ 1,863,375	
Interest from unaffiliated issuers	21,083	
<b>Total Investment Income</b>		<b><u>\$ 1,884,458</u></b>

#### EXPENSES:

Management fees	\$ 864,511	
Administrative expenses	39,504	
Distribution fees		
Class II	57,817	
Custodian fees	64	
Professional fees	71,170	
Printing expense	23,895	
Officers' and Trustees' fees	9,416	
Insurance expense	1,311	
Miscellaneous	4,322	
<b>Total expenses</b>		<b><u>\$ 1,072,010</u></b>
<b>Net investment income</b>		<b><u>\$ 812,448</u></b>

#### REALIZED AND UNREALIZED GAIN (LOSS) ON INVESTMENTS:

Net realized gain (loss) on:		
Investments in unaffiliated issuers		<u>\$ 4,307,131</u>
Change in net unrealized appreciation (depreciation) on:		
Investments in unaffiliated issuers	\$(35,705,012)	
Other assets and liabilities denominated in foreign currencies	(528)	<u>\$(35,705,540)</u>
<b>Net realized and unrealized gain (loss) on investments</b>		<b><u>\$(31,398,409)</u></b>
<b>Net decrease in net assets resulting from operations</b>		<b><u>\$(30,585,961)</u></b>

## Statements of Changes in Net Assets

	Year Ended 12/31/22	Year Ended 12/31/21
<b>FROM OPERATIONS:</b>		
Net investment income (loss)	\$ 812,448	\$ 359,031
Net realized gain (loss) on investments	4,307,131	21,275,624
Change in net unrealized appreciation (depreciation) on investments	(35,705,540)	14,626,360
Net increase (decrease) in net assets resulting from operations	<u>\$ (30,585,961)</u>	<u>\$ 36,261,015</u>
<b>DISTRIBUTIONS TO SHAREOWNERS:</b>		
Class I (\$2.83 and \$1.57 per share, respectively)	\$ (18,350,407)	\$ (10,344,714)

NOTE: The above financial highlights do not reflect the deduction of non-portfolio expenses associated with variable insurance products, such as mortality and expense risk charges, separate account charges, and sales charges.

## Notes to Financial Statements 12/31/22

**1. Organization and Significant Accounting Policies**

Pioneer Fund VCT Portfolio (the "Portfolio") is one of 8 portfolios comprising Pioneer Variable Contracts Trust (the "Trust"), a Delaware statutory trust. The Portfolio is registered under the Investment Company Act of 1940, as amended (the "1940 Act") as a diversified, open-end management investment company. The investment objectives of the Portfolio are reasonable income and capital growth.

The Portfolio offers two classes of shares designated as Class I and Class II shares. Each class of shares represents an interest in the same portfolio of investments of the Portfolio and has identical rights (based on relative net asset values) to assets and liquidation proceeds. Share classes can bear different rates of class-specific fees and expenses, such as transfer agent and distribution fees. Differences in class-specific fees and expenses will result in differences in net investment income and, therefore, the payment of different dividends from net investment income earned by each class. The Amended and Restated Declaration of Trust of the Trust gives the Board of Trustees the flexibility to specify either per-share voting or dollar-weighted voting when submitting matters for shareowner approval. Under per-share voting, each share of a class of the Portfolio is entitled to one vote. Under dollar-weighted voting, a shareowner's voting power is determined not by the number of shares owned, but by the dollar value of the shares on the record date. Each share class has exclusive voting rights with respect to matters affecting only that class, including with respect to the distribution plan for that class. There is no distribution plan for Class I shares.

Portfolio shares may be purchased only by insurance companies for the purpose of funding variable annuity and variable life insurance contracts or by qualified pension and retirement plans.

Amundi Asset Management US, Inc., an indirect, wholly owned subsidiary of Amundi and Amundi's wholly owned subsidiary, Amundi USA, Inc., serves as the Portfolio's investment adviser (the "Adviser"). Amundi Distributor US, Inc., an affiliate of the Adviser, serves as the Portfolio's distributor (the "Distributor").

Effective August 19, 2022, the Portfolio is required to comply with Rule 18f-4 under the 1940 Act, which governs the use of derivatives by registered investment companies. Rule 18f-4 permits funds to enter into derivatives transactions (as defined in Rule 18f-4) and certain other transactions notwithstanding the restrictions on the issuance of "senior securities" under Section 18 of the 1940 Act. Rule 18f-4 requires a fund to establish and maintain a comprehensive derivatives risk management program, appoint a derivatives risk manager and comply with a relative or absolute limit on fund leverage risk calculated based on value-at-risk ("VaR"), unless the portfolio uses derivatives in only a limited manner (a "limited derivatives user"). The Portfolio is currently a limited derivatives user for purposes of Rule 18f-4.

The Portfolio is an investment company and follows investment company accounting and reporting guidance under U.S. Generally Accepted Accounting Principles ("U.S. GAAP"). U.S. GAAP requires the management of the Portfolio to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income, expenses and gain or loss on investments during the reporting period. Actual results could differ from those estimates.

The following is a summary of significant accounting policies followed by the Portfolio in the preparation of its financial statements:

**A. Security Valuation**

The net asset value of the Portfolio is computed once daily, on each day the New York Stock Exchange ("NYSE") is open, as of the close of regular trading on the NYSE.

Equity securities that have traded on an exchange are valued by using the last sale price on the principal exchange where they are traded. Equity securities that have not traded on the date of valuation, or securities for which sale prices are not available, generally are valued using the mean between the last bid and asked prices or, if both last bid and asked prices are not available, at the last quoted bid price. Last sale and bid and asked prices are provided by independent third party pricing services. In the case of equity securities not traded on an exchange, prices are typically determined by independent third party pricing services using a variety of techniques and methods.

The value of foreign securities is translated into U.S. dollars based on foreign currency exchange rate quotations supplied by a third party pricing source. Trading in non-U.S. equity securities is substantially completed each day at various times prior to the close of the NYSE. The values of such securities used in computing the net asset value of the Portfolio's shares are determined as of such times. The Adviser may use a fair value model developed by an independent pricing service to value non-U.S. equity securities.

Shares of open-end registered investment companies (including money market mutual funds) are valued at such funds' net asset value.

Securities for which independent pricing services or broker-dealers are unable to supply prices or for which market prices and/or quotations are not readily available or are considered to be unreliable are valued by a fair valuation team comprised of certain personnel of the Adviser. Effective September 8, 2022, the Adviser is designated as the valuation designee for the Portfolio pursuant to Rule 2a-5 under the 1940 Act. The Adviser's fair valuation team is responsible for monitoring developments that may impact fair valued securities.

Inputs used when applying fair value methods to value a security may include credit ratings, the financial condition of the company, current market conditions and comparable securities. The Adviser may use fair value methods if it is determined that a significant event has occurred after the close of the exchange or market on which the security trades and prior to the determination of the Portfolio's net asset value. Examples of a significant event might include political or economic news, corporate restructurings, natural disasters, terrorist activity or trading halts. Thus, the valuation of the Portfolio's securities may differ significantly from exchange prices, and such differences could be material.

## **B. Investment Income and Transactions**

Dividend income is recorded on the ex-dividend date, except that certain dividends from foreign securities where the ex-dividend date may have passed are recorded as soon as the Portfolio becomes aware of the ex-dividend data in the exercise of reasonable diligence.

Interest income, including interest on income-bearing cash accounts, is recorded on the accrual basis. Dividend and interest income are reported net of unrecoverable foreign taxes withheld at the applicable country rates and net of income accrued on defaulted securities.

Interest and dividend income payable by delivery of additional shares is reclassified as PIK (payment-in-kind) income upon receipt and is included in interest and dividend income, respectively.

Security transactions are recorded as of trade date. Gains and losses on sales of investments are calculated on the identified cost method for both financial reporting and federal income tax purposes.

## **C. Foreign Currency Translation**

The books and records of the Portfolio are maintained in U.S. dollars. Amounts denominated in foreign currencies are translated into U.S. dollars using current exchange rates.

Net realized gains and losses on foreign currency transactions, if any, represent, among other things, the net realized gains and losses on foreign currency exchange contracts, disposition of foreign currencies and the difference between the amount of income accrued and the U.S. dollars actually received. Further, the effects of changes in foreign currency exchange rates on investments are not segregated on the Statement of Operations from the effects of changes in the market prices of those securities, but are included with the net realized and unrealized gain or loss on investments.

## **D. Federal Income Taxes**

It is the Portfolio's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net taxable income and net realized capital gains, if any, to its shareowners. Therefore, no provision for federal income taxes is required. As of December 31, 2022, the Portfolio did not accrue any interest or penalties with respect to uncertain tax positions, which, if applicable, would be recorded as an income tax expense on the Statement of Operations. Tax returns filed within the prior three years remain subject to examination by federal and state tax authorities.

The amount and character of income and capital gain distributions to shareowners are determined in accordance with federal income tax rules, which may differ from U.S. GAAP. Distributions in excess of net investment income or net realized gains are temporary over distributions for financial statement purposes resulting from differences in the recognition or classification of income or distributions for financial statement and tax purposes. Capital accounts within the financial statements are adjusted for permanent book/tax differences to reflect tax character, but are not adjusted for temporary differences.

A portion of the dividend income recorded by the Portfolio is from distributions by publicly traded real estate investment trusts ("REITs"), and such distributions for tax purposes may also consist of capital gains and return of capital. The actual return of capital and capital gains portions of such distributions will be determined by formal notifications from

## Notes to Financial Statements 12/31/22 (continued)

the REITs subsequent to the calendar year-end. Distributions received from the REITs that are determined to be a return of capital are recorded by the Portfolio as a reduction of the cost basis of the securities held and those determined to be capital gain are reflected as such on the Statement of Operations.

The tax character of distributions paid during the years ended December 31, 2022 and December 31, 2021, was as follows:

	2022	2021
<b>Distributions paid from:</b>		
Ordinary income	\$ 9,001,013	\$ 2,776,642
Long-term capital gains	13,093,590	9,551,997
<b>Total</b>	<b>\$22,094,603</b>	<b>\$12,328,639</b>

The following shows the components of distributable earnings (losses) on a federal income tax basis at December 31, 2022:

	2022
<b>Distributable earnings/(losses):</b>	
Undistributed ordinary income	\$ 78,363
Undistributed long-term capital gains	4,974,519
Other book/tax temporary differences	1
Net unrealized appreciation	21,540,336
<b>Total</b>	<b>\$26,593,219</b>

The differences between book-basis and tax-basis net unrealized appreciation are attributable to the tax deferral of losses on wash sales.

## E. Portfolio Shares and Class Allocations

The Portfolio records sales and repurchases of its shares as of trade date. Distribution fees for Class II shares are calculated based on the average daily net asset value attributable to Class II shares of the Portfolio (see Note 5). Class I shares do not pay distribution fees.

Income, common expenses (excluding transfer agent and distribution fees) and realized and unrealized gains and losses are calculated at the Portfolio level and allocated daily to each class of shares based on its respective percentage of the adjusted net assets at the beginning of the day.

All expenses and fees paid to the Portfolio's transfer agent for its services are allocated among the classes of shares based on the number of accounts in each class and the ratable allocation of related out-of-pocket expenses (see Note 4).

Dividends and distributions to shareowners are recorded on the ex-dividend date. Distributions paid by the Portfolio with respect to each class of shares are calculated in the same manner and at the same time, except that net investment income dividends to Class I and Class II shares can reflect different transfer agent and distribution expense rates.

## F. Risks

The value of securities held by the Portfolio may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political or regulatory conditions, recessions, the spread of infectious illness or other public health issues, inflation, changes in interest rates, armed conflict including Russia's military invasion of Ukraine, sanctions against Russia, other nations or individuals or companies and possible countermeasures, lack of liquidity in the bond markets or adverse investor sentiment. In the past several years, financial markets have experienced increased volatility, depressed valuations, decreased liquidity and heightened uncertainty. These conditions may continue, recur, worsen or spread. Recently, inflation and interest rates have increased and may rise further. These circumstances could adversely affect the value and liquidity of the Portfolio's investments, impair the Portfolio's ability to satisfy redemption requests, and negatively impact the Portfolio's performance. Raising the ceiling on U.S. government debt has become increasingly politicized. Any failure to increase the ceiling on U.S. government debt could lead to a default on U.S. government obligations, with unpredictable consequences for economies and markets.

The global pandemic of the novel coronavirus respiratory disease designated COVID-19 has resulted in major disruption to economies and markets around the world, including the United States. Global financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Liquidity for many instruments has

been greatly reduced for periods of time. Some sectors of the economy and individual issuers have experienced particularly large losses. These circumstances may continue to affect adversely the value and liquidity of the Portfolio's investments. Following Russia's invasion of Ukraine, Russian securities have lost all, or nearly all, their market value. Other securities or markets could be similarly affected by past or future political, geopolitical or other events or conditions.

Governments and central banks, including the U.S. Federal Reserve, have taken extraordinary and unprecedented actions to support local and global economies and the financial markets. These actions have resulted in significant expansion of public debt, including in the U.S. The consequences of high public debt, including its future impact on the economy and securities markets, may not be known for some time.

The U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. For example, the U.S. has imposed tariffs and other trade barriers on Chinese exports, has restricted sales of certain categories of goods to China, and has established barriers to investments in China. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. If the political climate between the U.S. and China does not improve or continues to deteriorate, if China were to attempt unification of Taiwan by force, or if other geopolitical conflicts develop or get worse, economies, markets and individual securities may be severely affected both regionally and globally, and the value of the Portfolio's assets may go down.

At times, the Portfolio's investments may represent industries or industry sectors that are interrelated or have common risks, making the Portfolio more susceptible to any economic, political, or regulatory developments or other risks affecting those industries and sectors. The Portfolio's investments in foreign markets and countries with limited developing markets may subject the Portfolio to a greater degree of risk than investments in a developed market. These risks include disruptive political or economic conditions and the imposition of adverse governmental laws or currency exchange restrictions.

The Portfolio's investments in foreign markets and countries with limited developing markets may subject the Portfolio to a greater degree of risk than investments in a developed market. These risks include disruptive political or economic conditions, military conflicts and sanctions, terrorism, sustained economic downturns, financial instability, less liquid trading markets, extreme price volatility, currency risks, reduction of government or central bank support, inadequate accounting standards, tariffs, tax disputes or other tax burdens, nationalization or expropriation of assets, and the imposition of adverse governmental laws, arbitrary application of laws and regulations or lack of rule of law, and investment and repatriation restrictions. Lack of information and less market regulation also may affect the value of these securities. Withholding and other non-U.S. taxes may decrease the Portfolio's return. Non-U.S. issuers may be located in parts of the world that have historically been prone to natural disasters. Investing in depositary receipts is subject to many of the same risks as investing directly in non-U.S. issuers. Depositary receipts may involve higher expenses and may trade at a discount (or premium) to the underlying security.

The Portfolio may invest in REIT securities, the value of which can fall for a variety of reasons, such as declines in rental income, fluctuating interest rates, poor property management, environmental liabilities, uninsured damage, increased competition, or changes in real estate tax laws.

Russia launched a large-scale invasion of Ukraine on February 24, 2022. In response to the military action by Russia, various countries, including the U.S., the United Kingdom, and European Union issued broad-ranging economic sanctions against Russia and Belarus and certain companies and individuals. Since then, Russian securities have lost all, or nearly all, their market value, and many other issuers, securities and markets have been adversely affected. The United States and other countries may impose sanctions on other countries, companies and individuals in light of Russia's military invasion. The extent and duration of the military action or future escalation of such hostilities, the extent and impact of existing and future sanctions, market disruptions and volatility, and the result of any diplomatic negotiations cannot be predicted. These and any related events could have a significant impact on the value and liquidity of certain Portfolio investments, on Portfolio performance and the value of an investment in the Portfolio, particularly with respect to securities and commodities, such as oil, natural gas and food commodities, as well as other sectors with exposure to Russian issuers or issuers in other countries affected by the invasion, and are likely to have collateral impacts on market sectors globally.

With the increased use of technologies such as the Internet to conduct business, the Portfolio is susceptible to operational, information security and related risks. While the Portfolio's Adviser has established business continuity plans in the event of, and risk management systems to prevent, limit or mitigate, such cyber-attacks, there are inherent

## Notes to Financial Statements 12/31/22 (continued)

limitations in such plans and systems, including the possibility that certain risks have not been identified. Furthermore, the Portfolio cannot control the cybersecurity plans and systems put in place by service providers to the Portfolio such as the Portfolio's custodian and accounting agent, and the Portfolio's transfer agent. In addition, many beneficial owners of Portfolio shares hold them through accounts at broker-dealers, retirement platforms and other financial market participants over which neither the Portfolio nor the Adviser exercises control. Each of these may in turn rely on service providers to them, which are also subject to the risk of cyber-attacks. Cybersecurity failures or breaches at the Adviser or the Portfolio's service providers or intermediaries have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Portfolio's ability to calculate its net asset value, impediments to trading, the inability of Portfolio shareowners to effect share purchases, redemptions or exchanges or receive distributions, loss of or unauthorized access to private shareowner information and violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, or additional compliance costs. Such costs and losses may not be covered under any insurance. In addition, maintaining vigilance against cyber-attacks may involve substantial costs over time, and system enhancements may themselves be subject to cyber-attacks.

The Portfolio's prospectus contains unaudited information regarding the Portfolio's principal risks. Please refer to that document when considering the Portfolio's principal risks.

## 2. Management Agreement

The Adviser manages the Portfolio. Management fees payable under the Portfolio's Investment Management Agreement with the Adviser are calculated daily and paid monthly at the annual rate of 0.65% of the Portfolio's average daily net assets. For the year ended December 31, 2022, the effective management fee was equivalent to 0.65% of the Portfolio's average daily net assets.

In addition, under the management and administration agreements, certain other services and costs, including accounting, regulatory reporting and insurance premiums, are paid by the Portfolio as administrative reimbursements.

## 3. Compensation of Officers and Trustees

The Portfolio pays an annual fee to its Trustees. The Adviser reimburses the Portfolio for fees paid to the Interested Trustees. Except for the chief compliance officer, the Portfolio does not pay any salary or other compensation to its officers. The Portfolio pays a portion of the chief compliance officer's compensation for his services as the Portfolio's chief compliance officer. Amundi US pays the remaining portion of the chief compliance officer's compensation. For the year ended December 31, 2022, the Portfolio paid \$9,416 in Officers' and Trustees' compensation, which is reflected on the Statement of Operations as Officers' and Trustees' fees. At December 31, 2022, on its Statement of Assets and Liabilities, the Portfolio had a payable for Trustees' fees of \$289 and a payable for administrative expenses of \$3,584, which includes the payable for Officers' compensation.

## 4. Transfer Agent

BNY Mellon Investment Servicing (US) Inc. serves as the transfer agent to the Portfolio at negotiated rates. Transfer agent fees and payables shown on the Statement of Operations and the Statement of Assets and Liabilities, respectively, include sub-transfer agent expenses incurred through the Portfolio's omnibus relationship contracts.

## 5. Distribution Plan

The Portfolio has adopted a distribution plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act with respect to Class II shares. Pursuant to the Plan, the Portfolio pays the Distributor a distribution fee of 0.25% of the average daily net assets attributable to Class II shares to compensate the Distributor for (1) distribution services and (2) personal and account maintenance services performed and expenses incurred by the Distributor in connection with the Portfolio's Class II shares.

## Report of Independent Registered Public Accounting Firm

### To the Board of Trustees of Pioneer Variable Contracts Trust and the Shareholders of Pioneer Fund VCT Portfolio:

#### Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Pioneer Fund VCT Portfolio (the "Portfolio") (one of the portfolios constituting Pioneer Variable Contracts Trust (the "Trust")), including the schedule of investments, as of December 31, 2022, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Pioneer Fund VCT Portfolio (one of the portfolios constituting Pioneer Variable Contracts Trust) at December 31, 2022, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and its financial highlights for each of the five years in the period then ended in conformity with U.S. generally accepted accounting principles.

#### Basis for Opinion

These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on the Portfolio's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of the Trust's internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2022, by correspondence with the custodian, brokers and others; when replies were not received from brokers and others, we performed other auditing procedures. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion

The signature of Ernst & Young LLP is written in a cursive, handwritten style in black ink.

We have served as the auditor of one or more investment companies in the Pioneer family of funds since 2017.

Boston, Massachusetts  
March 1, 2023

## Additional Information (unaudited)

For the year ended December 31, 2022, certain dividends paid by the Portfolio may be subject to a maximum tax rate of 20%. The Portfolio intends to designate up to the maximum amount of such dividends allowable as taxed at a maximum rate of 20%. Complete information will be computed and reported in conjunction with your 2022 Form 1099-DIV.

The Portfolio designated \$13,093,590 as long-term capital gains distributions during the year ended December 31, 2022. Distributable long-term gains are based on net realized long-term gains determined on a tax basis and may differ from such amounts for financial reporting purposes.

The qualifying percentage of the Portfolio's ordinary income dividends for the purpose of the corporate dividends received deduction was 25.95%.

## Approval of Renewal of Investment Management Agreement

Amundi Asset Management US, Inc. (“Amundi US”) serves as the investment adviser to Pioneer Fund VCT Portfolio (the “Portfolio”) pursuant to an investment management agreement between Amundi US and the Portfolio. In order for Amundi US to remain the investment adviser of the Portfolio, the Trustees of the Portfolio, including a majority of the Portfolio’s Independent Trustees, must determine annually whether to renew the investment management agreement for the Portfolio.

The contract review process began in January 2022 as the Trustees of the Portfolio agreed on, among other things, an overall approach and timeline for the process. Contract review materials were provided to the Trustees in March 2022, July 2022 and September 2022. In addition, the Trustees reviewed and discussed the Portfolio’s performance at regularly scheduled meetings throughout the year, and took into account other information related to the Portfolio provided to the Trustees at regularly scheduled meetings, in connection with the review of the Portfolio’s investment management agreement.

In March 2022, the Trustees, among other things, discussed the memorandum provided by Portfolio counsel that summarized the legal standards and other considerations that are relevant to the Trustees in their deliberations regarding the renewal of the investment management agreement, and reviewed and discussed the qualifications of the investment management teams for the Portfolio, as well as the level of investment by the Portfolio’s portfolio managers in the Portfolio. In July 2022, the Trustees, among other things, reviewed the Portfolio’s management fees and total expense ratios, the financial statements of Amundi US and its parent companies, profitability analyses provided by Amundi US, and analyses from Amundi US as to possible economies of scale. The Trustees also reviewed the profitability of the institutional business of Amundi US as compared to that of Amundi US’s fund management business, and considered the differences between the fees and expenses of the Portfolio and the fees and expenses of Amundi US’s institutional accounts, as well as the different services provided by Amundi US to the Portfolio and to the institutional accounts. The Trustees further considered contract review materials, including additional materials received in response to the Trustees’ request, in September 2022.

At a meeting held on September 20, 2022, based on their evaluation of the information provided by Amundi US and third parties, the Trustees of the Portfolio, including the Independent Trustees voting separately advised by independent counsel, unanimously approved the renewal of the investment management agreement for another year. In approving the renewal of the investment management agreement, the Trustees considered various factors that they determined were relevant, including the factors described below. The Trustees did not identify any single factor as the controlling factor in determining to approve the renewal of the agreement.

### **Nature, Extent and Quality of Services**

The Trustees considered the nature, extent and quality of the services that had been provided by Amundi US to the Portfolio, taking into account the investment objective and strategy of the Portfolio. The Trustees also reviewed Amundi US’s investment approach for the Portfolio and its research process. The Trustees considered the resources of Amundi US and the personnel of Amundi US who provide investment management services to the Portfolio. They also reviewed the amount of non-Portfolio assets managed by the portfolio managers of the Portfolio. They considered the non-investment resources and personnel of Amundi US that are involved in Amundi US’s services to the Portfolio, including Amundi US’s compliance, risk management, and legal resources and personnel. The Trustees noted the substantial attention and high priority given by Amundi US’s senior management to the Pioneer Fund complex, including with respect to the increasing regulation to which the Pioneer Funds are subject. The Trustees considered the effectiveness of Amundi US’s business continuity plan in response to the ongoing COVID-19 pandemic.

The Trustees considered that Amundi US supervises and monitors the performance of the Portfolio’s service providers and provides the Portfolio with personnel (including Portfolio officers) and other resources that are necessary for the Portfolio’s business management and operations. The Trustees also considered that, as administrator, Amundi US is responsible for the administration of the Portfolio’s business and other affairs. The Trustees considered that the Portfolio reimburses Amundi US its pro rata share of Amundi US’s costs of providing administration services to the Pioneer Funds.

Based on these considerations, the Trustees concluded that the nature, extent and quality of services that had been provided by Amundi US to the Portfolio were satisfactory and consistent with the terms of the investment management agreement.

### **Performance of the Portfolio**

In considering the Portfolio’s performance, the Trustees regularly review and discuss throughout the year data prepared by Amundi US and information comparing the Portfolio’s performance with the performance of its peer group of funds, as classified by Morningstar, Inc. (Morningstar), and with the performance of the Portfolio’s benchmark index. They also discuss the Portfolio’s performance with Amundi US on a regular basis. The Trustees’ regular reviews and discussions were factored into the Trustees’ deliberations concerning the renewal of the investment management agreement.

## Approval of Renewal of Investment Management Agreement (continued)

### Management Fee and Expenses

The Trustees considered information showing the fees and expenses of the Portfolio in comparison to the management fees of its peer group of funds as classified by Morningstar and also to the expense ratios of a peer group of funds selected on the basis of criteria determined by the Independent Trustees for this purpose using data provided by Strategic Insight Mutual Fund Research and Consulting, LLC (Strategic Insight), an independent third party. The peer group comparisons referred to below are organized in quintiles. Each quintile represents one-fifth of the peer group. In all peer group comparisons referred to below, first quintile is most favorable to the Portfolio's shareowners. The Trustees noted that they separately review and consider the impact of the Portfolio's transfer agency and Portfolio- and Amundi US-paid expenses for sub-transfer agency and intermediary arrangements, and that the results of the most recent such review were considered in the consideration of the Portfolio's expense ratio.

The Trustees considered that the Portfolio's management fee for the most recent fiscal year was in the fourth quintile relative to the management fees paid by other funds in its Morningstar category for the comparable period. The Trustees noted Amundi US's explanation of the reasons that the Portfolio's management fee was in the fourth quintile relative to the management fees paid by other funds in its Morningstar category. The Trustees considered that the expense ratio of the Portfolio's Class I shares for the most recent fiscal year was in the third quintile relative to its Strategic Insight peer group for the comparable period.

The Trustees reviewed management fees charged by Amundi US to institutional and other clients, including publicly offered European funds sponsored by Amundi US's affiliates, unaffiliated U.S. registered investment companies (in a sub-advisory capacity), and unaffiliated foreign and domestic separate accounts. The Trustees also considered Amundi US's costs in providing services to the Portfolio and Amundi US's costs in providing services to the other clients and considered the differences in management fees and profit margins for fund and non-fund services. In evaluating the fees associated with Amundi US's client accounts, the Trustees took into account the respective demands, resources and complexity associated with the Portfolio and other client accounts. The Trustees noted that, in some instances, the fee rates for those clients were lower than the management fee for the Portfolio and considered that, under the investment management and administration agreements with the Portfolio, Amundi US performs additional services for the Portfolio that it does not provide to those other clients or services that are broader in scope, including oversight of the Portfolio's other service providers and activities related to compliance and the extensive regulatory and tax regimes to which the Portfolio is subject. The Trustees also considered the entrepreneurial risks associated with Amundi US's management of the Portfolio.

The Trustees concluded that the management fee payable by the Portfolio to Amundi US was reasonable in relation to the nature and quality of the services provided by Amundi US.

### Profitability

The Trustees considered information provided by Amundi US regarding the profitability of Amundi US with respect to the advisory services provided by Amundi US to the Portfolio, including the methodology used by Amundi US in allocating certain of its costs to the management of the Portfolio. The Trustees also considered Amundi US's profit margin in connection with the overall operation of the Portfolio. They further reviewed the financial results, including the profit margins, realized by Amundi US from non-fund businesses. The Trustees considered Amundi US's profit margins in comparison to the limited industry data available and noted that the profitability of any adviser was affected by numerous factors, including its organizational structure and method for allocating expenses. The Trustees concluded that Amundi US's profitability with respect to the management of the Portfolio was not unreasonable.

### Economies of Scale

The Trustees considered Amundi US's views relating to economies of scale in connection with the Pioneer Funds as fund assets grow and the extent to which any such economies of scale are shared with the Portfolio and Portfolio shareholders. The Trustees recognize that economies of scale are difficult to identify and quantify, and that, among other factors that may be relevant, are the following: fee levels, expense subsidization, investment by Amundi US in research and analytical capabilities and Amundi US's commitment and resource allocation to the Portfolio. The Trustees noted that profitability also may be an indicator of the availability of any economies of scale, although profitability may vary for other reasons including due to reductions in expenses. The Trustees concluded that economies of scale, if any, were being appropriately shared with the Portfolio.

### Other Benefits

The Trustees considered the other benefits that Amundi US enjoys from its relationship with the Portfolio. The Trustees considered the character and amount of fees paid or to be paid by the Portfolio, other than under the investment management agreement, for services provided by Amundi US and its affiliates. The Trustees further considered the revenues and profitability of Amundi US's businesses other than the fund business. To the extent applicable, the Trustees also

considered the benefits to the Portfolio and to Amundi US and its affiliates from the use of “soft” commission dollars generated by the Portfolio to pay for research and brokerage services.

The Trustees considered that Amundi US is the principal U.S. asset management business of Amundi, which is one of the largest asset managers globally. Amundi’s worldwide asset management business manages over \$2.2 trillion in assets (including the Pioneer Funds). The Trustees considered that Amundi US’s relationship with Amundi creates potential opportunities for Amundi US and Amundi that derive from Amundi US’s relationships with the Portfolio, including Amundi’s ability to market the services of Amundi US globally. The Trustees noted that Amundi US has access to additional research and portfolio management capabilities as a result of its relationship with Amundi and Amundi’s enhanced global presence that may contribute to an increase in the resources available to Amundi US. The Trustees considered that Amundi US and the Portfolio receive reciprocal intangible benefits from the relationship, including mutual brand recognition and, for the Portfolio, direct and indirect access to the resources of a large global asset manager. The Trustees concluded that any such benefits received by Amundi US as a result of its relationship with the Portfolio were reasonable.

### **Conclusion**

After consideration of the factors described above as well as other factors, the Trustees, including the Independent Trustees, concluded that the investment management agreement for the Portfolio, including the fees payable thereunder, was fair and reasonable and voted to approve the proposed renewal of the investment management agreement.

## Trustees, Officers and Service Providers

The Portfolio's Trustees and officers are listed below, together with their principal occupations and other directorships they have held during at least the past five years. Trustees who are interested persons of the Portfolios within the meaning of the 1940 Act are referred to as Interested Trustees. Trustees who are not interested persons of the Portfolio are referred to as Independent Trustees. Each of the Trustees serves as a Trustee of each of the 51 U.S. registered investment portfolios for which Amundi US serves as investment adviser (the "Pioneer Funds"). The address for all Trustees and all officers of the Portfolios is 60 State Street, Boston, Massachusetts 02109.

Name, Age and Position Held With the Trust	Term of Office and Length of Service	Principal Occupation(s) During At Least The Past Five Years	Other Directorships Held by Trustee During At Least The Past Five Years
<b>Independent Trustees</b>			
<b>Thomas J. Perna (72)</b> Chairman of the Board and Trustee	Trustee since 2006. Serves until a successor trustee is elected or earlier retirement or removal.
